

## AquaCircle355

- Built and delivered according to NS 9415
- Documented strength and stability
- 3 x Ø355 SDR 17.6 floating pipes
- Integrated net fasteners
- Hidden stop blocks
- 20-year design service life

# Ocea AquaCircle 355

- sturdy yet flexible plastic cages for a tough climate

- Feed barges
- Feed systems
- Workboats
- Plastic cages**
- Steel cages
- Mercatus software
- Accessories and special equipment

Ocea launched the AquaCircle 355 cage at AquaNor 2007. With its unique design and new technology, the new cage is a revolution for safer and more profitable fish farming. AquaCircle has three floating pipes, providing unparalleled safety and flotation. The design (patent pending) makes it incredibly easy to maintain and change parts. All parts can be replaced at sea - without interrupting operations and without the need for welding.

AquaCircle 355 has NS 9415 certification for cages from 120 - 160 metres. Every element has a smooth surface so cleaning is much simpler. With integrated cable pipes, it is safe and easy to lay cables, air hoses etc.

**Ocea Feed-Station** is Ocea's 5th generation central feed system.

oceo **feedstation**<sup>®</sup>

FeedStation consists of a computer programme, industrial PLC, distribution valve, air blowers and auger dozers with air lock sluices. The system is fully scalable and capacity can be upgraded if required. Feed-Station supports all modern methods of fish feeding.

A simplified user interface provides fish farmers with complete control and allows users to achieve the best results from production.

Flexible solutions and options

Strength combined with flexibility

20-year design lifetime

A safe and sturdy work station

## Product specifications

AquaCircle 355 is a sturdy and well-tested design. 3 floating pipes surround the cage, providing excellent working conditions both summer and winter, unparalleled safety, stability and flotation.

- Dividable clamps
- Integrated net fasteners
- Hidden stop blocks
- Rotational moulding
- 3 rings

WAVE CLASSIFICATION:	
Wave classification:	D
Max significant wave height:	3.0m
Description:	High exposure

CURRENT CLASSIFICATION:	
Current classification:	C
Maximum current velocity:	1.0 m/s
Description:	High exposure

DIMENSIONS:	
Floating pipe:	3 x ø355 SDR 17.6
Top rail:	1 x ø140 SDR 11
Clamps:	Rotational mould 4 parts All in PE material
