

Workboats

- Sturdy steel hulls with zinc coating
- Spacious working deck with crane and yardarm
- Excellent performance at sea and high speeds
- Improved load capacity and stability
- Improved working environment and safety

a **NEW** generation

Ocea workboats

Built for speed and efficiency

MULTI-PURPOSE CATAMARAN

VS815

Feed barges
Feeding systems

Workboats

Plastic cages

Steel cages

Mercatus software

Accessories
and special equipment

As a turnkey supplier of equipment for aquaculture and fish farming, Ocea is proud to now present their new Multi-Purpose Catamaran workboats.

Ocea has acquired the rights and drawings to the well-known boats from Risnes Marine Partner and recruited key personnel from RMP. The boats are built and designed by Ocea, and drawn and developed in cooperation with Vik-Sandvik AS. With steel hulls and aluminium pilothouses, these boats are sturdy enough to last a lifetime.

Built for speed and efficiency

The workboats from RPM are designed and built for high strength and safety, keeping in mind environmental considerations and a long lifetime. Ocea aims to meet the market demands for increased capacity, stability and speed. The boats are supplied in different sizes, up to 15 metres in length, and are produced in accordance with the Nordic Boat Standard. The boats are constructed in steel with aluminium pilothouse. Combined with the zinc coating on the steel hull, you have a strong and robust workboat with a long lifetime and minimum maintenance requirement. The hulls are a relatively new development, designed in cooperation with Vik-Sandvik AS, and can reach high speeds of up to 20 knots.

Ocea workboats

Built for speed and efficiency

- Feed barges
- Feeding systems
- Workboats**
- Plastic cages
- Steel cages
- Mercatus software
- Accessories and special equipment

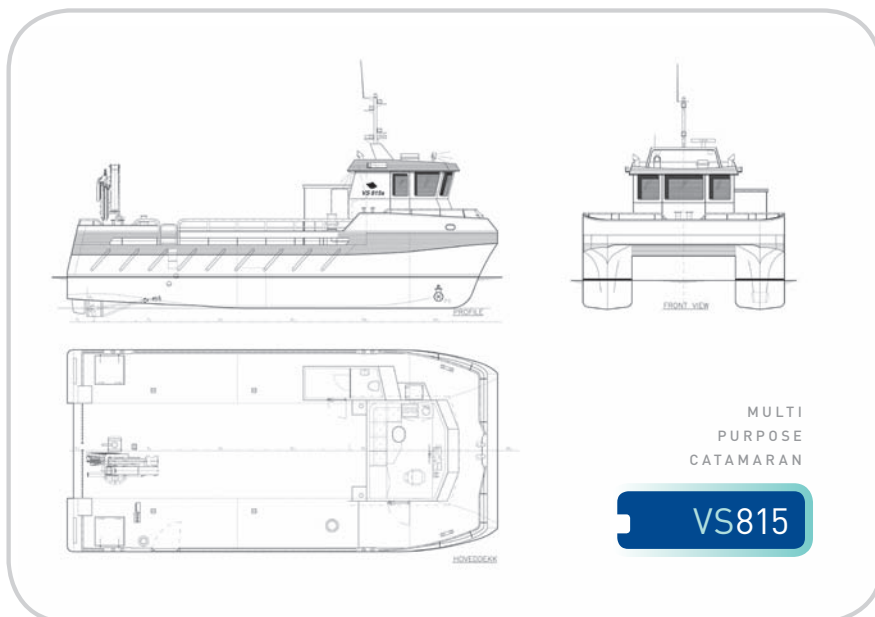

SPECIFICATIONS:	VS815
Length over all	14.95 m
Beam	7 or 8 m
Moulded depth	2.2 m
Moulded breadth	0.5 m
Engine	From 2 x 500 HP
Bow thrusters	Optional bow and/or stern thrusters
Deck crane, radio controlled	Up to 45 t/m
Capstan	< 2 capstans, <5 tons each
Winch, radio controlled (option)	<15 ton deck-mounted winch
Load capacity	31 t
Speed	Up to 20 knots

The boats can be built in different sizes with flexible layout adapted to specific requirements.

Product highlights:

- Robust steel boats built on good traditions
- Zinc coated hull surface
- Working deck with crane and winch, extremely flexible
- New streamlining providing high performance and speeds
- Elevated foredeck providing high bow height and improved load capacity
- High buoyancy volume providing good stability when using crane
- Built according to Nordic Boat Standard for working vessels up to 15 metres
